December, 2006

## Safety First

With the winter months upon us it continues to get dark earlier and stay dark longer in the morning. Clear visibility can often be a problem during these low light times. We have noticed trucks that turn their lights off during these times. While this is an effort not to blind anyone and they believe they are doing this as a courtesy to the other drivers and our loader operators they are actually putting themselves, their equipment, and others in danger. In many cases in the low morning light the truck lights are the only way for these vehicles to be recognized. Please remind any trucks and drivers coming to our operations to keep their lights on during these times of low light.

## Stoneco Winter Hours

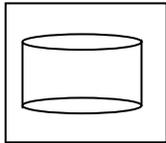

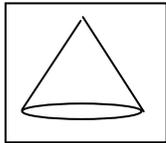

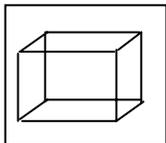

The below hours go into effect December 4th. Please keep in mind that any operation that is scheduled closed can be opened at your request. Please contact Ryan Lumpford at (734) 777-3396 to make the necessary arrangements.

## 2007 Price Sheet

We are distributing an updated price sheet that will go into effect on Monday, January 8th, 2007. If you received this newsletter by mail or email there should be a copy attached. At any time to request a copy of our most current prices please contact our offices and one can be faxed or emailed to you. Please contact us with any questions regarding the updated price sheets.

## Product Calculator.net

Product Type: \_\_\_\_\_

Length: \_\_\_\_\_

Width: \_\_\_\_\_

Depth: \_\_\_\_\_

WWW.STONECO.NET has many features that can assist with coordinating any project. One of the best of these features is the online product calculator for all your estimating needs. The material type stone or sand needs to be selected. If estimating a cube or box area enter the length, width, and depth. If estimating a cone enter the radius and height. To estimate a cylinder enter the radius and height. The radius is both the distance from the center of the circle to any point of the circle or half of the diameter. This feature is a great tool that can help in both large and small projects. Check out the website for other useful tools and interesting information.
