

Safety First

Backing In

When you drive in to any of our locations it is common place to see all pedestrian vehicles backed in to their parking places. We believe it's safer to drive past an empty parking space ensuring there are no hazards and a safe environment to park exists, versus baking out of a parking space into oncoming truck traffic. When leaving our facility it allows our employees and visitors the opportunity to circle their vehicle checking for hazards and safely pull out into traffic looking both ways. When parking you will notice there are signs posted asking that you back in, when visiting our sites please join us in this best practice.

We Are For D.U.

We recently donated the former "East" property at Zeeb Road to Ducks Unlimited. The donation is estimated at \$2.1 Million and the DU plans to use the site wildlife habitat development through wetland restoration, grassland plantings, and reforestation. Speaking of the donation Rick Becker VP of Michigan Aggregates stated "Stoneco has witnessed all of the advancements in wetlands restoration and conservation projects partnering with Ducks Unlimited in Monroe County. Making this property available to Ducks Unlimited allows the advancement of those efforts in other parts of the state. Our company, employees, and families do business, live, and work in Washtenaw County this is a natural extension of who we are and what we do." "We are grateful to Stoneco for its generous gift of property," said Todd Fox, Ducks Unlimited director of development for Michigan. "Having strong partners in our community like Stoneco is pivotal to our conservation work and underlies their dedication to corporate responsibility."

NSSGA Awards

Stoneco was recently recognized nationally for our efforts in public relations by the National Stone Sand and Gravel Association. Receiving six awards the Newport Quarry was honored with a Silver award and the 100th St, Denniston, Maybee, Ottawa Lake, and Zeeb Road locations were all honored with Bronze Awards. The Award was created in 1989 to recognize aggregate producers whose community involvement and support activities have enhanced the public's perception of the aggregates industry. Please join us in congratulating these operations.
